Freedom Knee® *Free Physician Seminar* —
Minimally Invasive Total Knee Replacement

Freedom Knee® — Minimally Invasive Total Knee Replacement

Steve Nguyen, M.D.

Joint Replacement Specialist

Dr. Nguyen is an orthopaedic surgeon, well known as an innovator and leader for his approach to complex procedures. He is the only orthopaedic surgeon offering this revolutionary surgery.

An effective healthcare solution for those with busy lives

Freedom Knee® replacement is an exclusive, revolutionary surgical method **unlike any other in the entire U.S.** that provides a pain-free knee that is both functional and durable. One simple incision through the side of the knee not only saves the quadriceps muscle, it **gets patients up and walking in less than a week...without any assisted devices.**

Because there is less damage to the tissue around the knee, patients who undergo this procedure can expect a **shorter hospital stay, a shorter recovery, and years of pain-free living.**
